Subject Index

Volume 78, January-June 1996

A

Absorption

- Intestinal Absorption of Sodium and Nitric Oxide-Dependent Vasodilation Interact to Dominate Resting Vascular Resistance, 231

Accessory connection

- The Development of the Atrioventricular Junction in the Human Heart, 110

Acetylcholine

- α_1 -Adrenergic Inhibition of the β -Adrenergically Activated Cl^- Current in Guinea Pig Ventricular Myocytes, 1090
- Effect of Membrane Potential on the Initiation of Acetylcholine-Induced Ca^{2+} Transients in Isolated Guinea Pig Coronary Myocytes, 717
- Nitric Oxide Synthase Activity in Guinea Pig Ventricular Myocytes Is Not Involved in Muscarinic Inhibition of cAMP-Regulated Ion Channels, 925

Acetylsalicylic acid

- Inhibitory Effects of TA-993, a New 1,5-Benzothiazepine Derivative, on Platelet Aggregation, 643

Acidosis

- Binding of Cytosolic Proteins to Myofibrils in Ischemic Rat Hearts, 821

Actin

- EJ-Ras Inhibits Phospholipase C_1 but Not Actin Polymerization Induced by Platelet-Derived Growth Factor-BB via Phosphatidylinositol 3-Kinase, 312

Action potential

- Electrical Activity Underlying Rhythmic Contraction in Human Pial Arteries, 148
- Ionic Mechanism of Action Potential Prolongation in Ventricular Myocytes From Dogs With Pacing-Induced Heart Failure, 262

Activation delay

- Cellular Basis for the Negative Dromotropic Effect of Adenosine on Rabbit Single Atrioventricular Nodal Cells, 697

Active tension

- Creatine Kinase Is the Main Target of Reactive Oxygen Species in Cardiac Myofibrils, 1016

Actomyosin

- Effect of Endothelin-1 on Actomyosin ATPase Activity: Implications for the Efficiency of Contraction, 1044

Adenosine

- Adenosine A_1 Stimulation Activates δ -Protein Kinase C in Rat Ventricular Myocytes, 161
- Synergistic Modulation of ATP-Sensitive K^+ Currents by Protein Kinase C and Adenosine: Implications for Ischemic Preconditioning, 443

Adenosine A_1 receptor

- Activation of Histamine H_3 -Receptors Inhibits Carrier-Mediated Norepinephrine Release During Prolonged Myocardial Ischemia: Comparison With Adenosine A_1 -Receptors and α_2 -Adrenoceptors, 475

Adenosine A_2 receptor

- Preconditioning of Bovine Endothelial Cells: The Protective Effect Is Mediated by an Adenosine A_2 Receptor Through a Protein Kinase C Signaling Pathway, 73

Adenovirus

- Novel Adenovirus Component System That Transfects Cultured Cardiac Cells With High Efficiency, 971

Adenylyl cyclase

- Effect of Ischemic Preconditioning of the Myocardium on cAMP, 137

Adhesion

- Regulation of β_1 -Integrin Function in Cultured Human Vascular Smooth Muscle Cells, 596

α -Adrenergic receptor

- Differential Sensitivity of Venular and Arteriolar α -Adrenergic Receptor Constriction to Inhibition by Hypoxia: Role of Receptor Subtype and Coupling Heterogeneity, 1064

β -Adrenergic receptor kinase

- Transgenic Manipulation of Myocardial G Protein-Coupled Receptors and Receptor Kinases, 511

β -Adrenergic regulation

- Nitric Oxide Synthase Activity in Guinea Pig Ventricular Myocytes Is Not Involved in Muscarinic Inhibition of cAMP-Regulated Ion Channels, 925

α_2 -Adrenoceptor

- Activation of Histamine H_3 -Receptors Inhibits Carrier-Mediated Norepinephrine Release During Prolonged Myocardial Ischemia: Comparison With Adenosine A_1 -Receptors and α_2 -Adrenoceptors, 475

Adult cardiomyocyte

- Endothelin-1 and Angiotensin II Receptors in Cells From Rat Hypertrophied Heart: Receptor Regulation and Intracellular Ca^{2+} Modulation, 302

Adult respiratory distress syndrome

- Locally Produced Tumor Necrosis Factor- α Mediates Interleukin-2-Induced Lung Injury, 329

Allergy

- Adenosine-Induced Vasoconstriction In Vivo: Role of the Mast Cell and A_3 Adenosine Receptor, 627

Amino acid

- Differential Regulation of L-Arginine Transport and Nitric Oxide Production by Vascular Smooth Muscle and Endothelium, 1075

Angiogenesis

- In Vivo Survival and Function of Transplanted Rat Cardiomyocytes, 283

Angioplasty

- Chronic Inhalation of Nitric Oxide Inhibits Neointimal Formation After Balloon-Induced Arterial Injury, 337
- Specific Accumulation of Lipoprotein(a) in Balloon-Injured Rabbit Aorta In Vivo, 615

Angiotensin II

- Altered Ventricular and Myocyte Response to Angiotensin II in Pacing-Induced Heart Failure, 880
- Angiotensin II Decreases a Resting K^+ Conductance in Rat Bulbosplinal Neurons of the C1 Area, 274
- Endothelin-1 and Angiotensin II Receptors in Cells From Rat Hypertrophied Heart: Receptor Regulation and Intracellular Ca^{2+} Modulation, 302
- Passive Load and Angiotensin II Evoke Differential Responses of Gene Expression and Protein Synthesis in Cardiac Myocytes, 829

Animal model

- Ionic Mechanism of Action Potential Prolongation in Ventricular Myocytes From Dogs With Pacing-Induced Heart Failure, 262

Anoxia

- Transient Ischemia Reduces Norepinephrine Release During Sustained Ischemia: Neural Preconditioning in Isolated Rat Heart, 573

Antiarrhythmic agent

- Evidence for Two Components of Delayed Rectifier K^+ Current in Human Ventricular Myocytes, 689
- Molecular Analysis of a Binding Site for Quinidine in a Human Cardiac Delayed Rectifier K^+ Channel: Role of S6 in Antiarrhythmic Drug Binding, 1105

Antiplatelet effect

Inhibitory Effects of TA-993, a New 1,5-Benzothiazepine Derivative, on Platelet Aggregation, 643

Antisense oligodeoxynucleotide

Depletion of Mitogen-Activated Protein Kinase Using an Antisense Oligodeoxynucleotide Approach Downregulates the Phenylephrine-Induced Hypertrophic Response in Rat Cardiac Myocytes, 954

Aorta

Tropoelastin Gene Expression in Individual Vascular Smooth Muscle Cells: Relationship to DNA Synthesis During Vascular Development and After Arterial Injury, 388

Arachidonic acid

Identification of Epoxyeicosatrienoic Acids as Endothelium-Derived Hyperpolarizing Factors, 415

L-Arginine

Nitric Oxide Attenuates Neutrophil-Mediated Myocardial Contractile Dysfunction After Ischemia and Reperfusion, 65

Arterial growth

Developmental Remodeling of the Internal Elastic Lamina of Rabbit Arteries: Effect of Blood Flow, 799

Arterial injury

Migration of Arterial Wall Cells: Expression of Plasminogen Activators and Inhibitors in Injured Rat Arteries, 405

Arterial remodeling

Developmental Remodeling of the Internal Elastic Lamina of Rabbit Arteries: Effect of Blood Flow, 799

Arteriole

Adenosine-Induced Vasoconstriction In Vivo: Role of the Mast Cell and A_3 Adenosine Receptor, 627

Artery

Inhibition of Matrix Metalloproteinase Activity Inhibits Smooth Muscle Cell Migration but Not Neointimal Thickening After Arterial Injury, 38

Atherosclerosis

Nitric Oxide Reversibly Inhibits the Migration of Cultured Vascular Smooth Muscle Cells, 225

Specific Accumulation of Lipoprotein(a) in Balloon-Injured Rabbit Aorta In Vivo, 615

ATP

Extracellular ATP Inhibits Adrenergic Agonist-Induced Hypertrophy of Neonatal Cardiac Myocytes, 525

ATP-sensitive K^+ channel

Morphine Mimics the Cardioprotective Effect of Ischemic Preconditioning via a Glibenclamide-Sensitive Mechanism in the Rat Heart, 1100

ATP-sensitive K^+ current

Synergistic Modulation of ATP-Sensitive K^+ Currents by Protein Kinase C and Adenosine: Implications for Ischemic Preconditioning, 443

ATPase

Effect of Endothelin-1 on Actomyosin ATPase Activity: Implications for the Efficiency of Contraction, 1044

Atrial cell

Enhancement of the L-Type Ca^{2+} Current by Mechanical Stimulation in Single Rabbit Cardiac Myocytes, 650

Atrial granule

Identification of rab12 as a Secretory Granule-Associated Small GTP-Binding Protein in Atrial Myocytes, 343

Atrial myocyte

Identification of rab12 as a Secretory Granule-Associated Small GTP-Binding Protein in Atrial Myocytes, 343

Two Components of Delayed Rectifier Current in Canine Atrium and Ventricle: Does I_{Kr} Play a Role in the Reverse Rate Dependence of Class III Agents? 26

Atrial natriuretic factor

Aging Does Not Affect the Activation of the Myocyte Insulin-Like Growth Factor-1 Autocrine System After Infarction and Ventricular Failure in Fischer 344 Rats, 536

Atrial natriuretic factor expression

Depletion of Mitogen-Activated Protein Kinase Using an Antisense Oligodeoxynucleotide Approach Downregulates the Phenylephrine-Induced Hypertrophic Response in Rat Cardiac Myocytes, 954

Atrioventricular junction

The Development of the Atrioventricular Junction in the Human Heart, 110

Atrioventricular node

Nitric Oxide Synthase (NOS3)-Mediated Cholinergic Modulation of Ca^{2+} Current in Adult Rabbit Atrioventricular Nodal Cells, 998

Autoimmune myocarditis

Analysis of Heart-Infiltrating T-Cell Clonotypes in Experimental Autoimmune Myocarditis in Rats, 118

High and Low Molecular Weight Fibroblast Growth Factor-2 Increase Proliferation of Neonatal Rat Cardiac Myocytes but Have Differential Effects on Binucleation and Nuclear Morphology: Evidence for Both Paracrine and Intracrine Actions of Fibroblast Gro, 126

Automaticity

Thrombin Receptor Actions in Neonatal Rat Ventricular Myocytes, 553

B**Balloon angioplasty**

Expression of Endothelin-1, Endothelin-3, Endothelin-Converting Enzyme-1, and Endothelin-A and Endothelin-B Receptor mRNA After Angioplasty-Induced Neointimal Formation in the Rat, 322

Balloon injury

Myocyte Enhancer Binding Factor-2 Expression and Activity in Vascular Smooth Muscle Cells: Association With the Activated Phenotype, 196

Binucleation

High and Low Molecular Weight Fibroblast Growth Factor-2 Increase Proliferation of Neonatal Rat Cardiac Myocytes but Have Differential Effects on Binucleation and Nuclear Morphology: Evidence for Both Paracrine and Intracrine Actions of Fibroblast Growth Factor-2, 126

Blood-brain barrier

Inhibition of Inducible Nitric Oxide Synthase Prevents Myocardial and Systemic Vascular Barrier Dysfunction During Early Cardiac Allograft Rejection, 769

Blood flow

Intestinal Absorption of Sodium and Nitric Oxide-Dependent Vasodilation Interact to Dominate Resting Vascular Resistance, 231

Blood substitute

Removal of Arg¹⁴¹ From the α Chain of Human Hemoglobin by Carboxypeptidases N and M, 635

bmyf5

Cardiomyopathy in Transgenic myf5 Mice, 379

Bradykinin

Histamine H_2 -Receptor-Mediated Inhibition of Calcitonin Gene-Related Peptide Release From Cardiac C Fibers: A Regulatory Negative-Feedback Loop, 863

C**C1 neuron**

Angiotensin II Decreases a Resting K^+ Conductance in Rat Bulbosplinal Neurons of the C1 Area, 274

 Ca^{2+}

Endothelin-Dependent Actions in Cultured AT-1 Cardiac Myocytes: The Role of the ϵ Isoform of Protein Kinase C, 724

Synergistic Actions of Glucagon and Miniglucagon on Ca^{2+} Mobilization in Cardiac Cells, 102

Thrombin Receptor Actions in Neonatal Rat Ventricular Myocytes, 553

Variability of Spontaneous Ca^{2+} Release Between Different Rat Ventricular Myocytes Is Correlated With Na^+ - Ca^{2+} Exchange and $[Na^+]_i$, 857

 Ca^{2+} -activated transient outward current

Unitary Cl^- Channels Activated by Cytoplasmic Ca^{2+} in Canine Ventricular Myocytes, 936

 Ca^{2+} channel

Developmental Changes in β -Adrenergic Modulation of L-Type Ca^{2+} Channels in Embryonic Mouse Heart, 371

- Electrical Activity Underlying Rhythmic Contraction in Human Pial Arteries, 148

Differential Regulation of L-Arginine Transport and Nitric Oxide Production by Vascular Smooth Muscle and Endothelium, 1075

Identification of Epoxyeicosatrienoic Acids as Endothelium-Derived Hyperpolarizing Factors, 415

Myocyte Enhancer Binding Factor-2 Expression and Activity in Vascular Smooth Muscle Cells: Association With the Activated Phenotype, 196

Structure and Characterization of the 5'-Flanking Region of the Mouse Smooth Muscle Myosin Heavy Chain (SM1/2) Gene, 978

Smooth muscle cell

Migration of Arterial Wall Cells: Expression of Plasminogen Activators and Inhibitors in Injured Rat Arteries, 405

Preferential Differentiation of P19 Mouse Embryonal Carcinoma Cells Into Smooth Muscle Cells: Use of Retinoic Acid and Antisense Against the Central Nervous System-Specific POU Transcription Factor Brn-2, 395

Regulated Expression of the Ets-1 Transcription Factor in Vascular Smooth Muscle Cells In Vivo and In Vitro, 589

SM22 α , a Marker of Adult Smooth Muscle, Is Expressed in Multiple Myogenic Lineages During Embryogenesis, 188

Smooth muscle myosin heavy chain

Endogenous Retinoic Acid Signaling Colocalizes With Advanced Expression of the Adult Smooth Muscle Myosin Heavy Chain Isoform During Development of the Ductus Arteriosus, 790

Sodium

Intestinal Absorption of Sodium and Nitric Oxide-Dependent Vasodilation Interact to Dominate Resting Vascular Resistance, 231

Sp1

Structure and Characterization of the 5'-Flanking Region of the Mouse Smooth Muscle Myosin Heavy Chain (SM1/2) Gene, 978

Spermine-spermidine-putrescine cloning

Inward Rectification and Implications for Cardiac Excitability, 1

Spiral wave

Reentrant Wave Fronts in Wiggers' Stage II Ventricular Fibrillation: Characteristics and Mechanisms of Termination and Spontaneous Regeneration, 660

Spontaneously hypertensive rats—stroke prone

Regulation of Very-Low-Density Lipoprotein Receptor in Hypertrophic Rat Heart, 8

Stress

Stress-Activated Protein Kinases in Cardiovascular Disease, 947

Stromelysin

Regulation of Matrix Metalloproteinases and Plasminogen Activator Inhibitor-1 Synthesis by Plasminogen in Cultured Human Vascular Smooth Muscle Cells, 44

Structure-function analysis

Molecular Analysis of a Binding Site for Quinidine in a Human Cardiac Delayed Rectifier K^+ Channel: Role of S6 in Antiarrhythmic Drug Binding, 1105

Sudden cardiac death

Reentrant Wave Fronts in Wiggers' Stage II Ventricular Fibrillation: Characteristics and Mechanisms of Termination and Spontaneous Regeneration, 660

Sudden death

Differential Response to Na^+ Channel Blockade, β -Adrenergic Stimulation, and Rapid Pacing in a Cellular Model Mimicking the SCN5A and HERG Defects Present in the Long-QT Syndrome, 1009

Sulcus

The Development of the Atrioventricular Junction in the Human Heart, 110

Sympathetic drive

Adverse Effects of Chronic Endogenous Sympathetic Drive Induced by Cardiac G_{sa} Overexpression, 517

Sympathetic stimulation

Differential Response to Na^+ Channel Blockade, β -Adrenergic Stimulation, and Rapid Pacing in a Cellular Model Mimicking the SCN5A and HERG Defects Present in the Long-QT Syndrome, 1009

Sympathetic vasomotor tone

Angiotensin II Decreases a Resting K^+ Conductance in Rat Bulbosplinal Neurons of the C1 Area, 274

Synthesis

DNA Synthesis in Adult Feline Ventricular Myocytes: Comparison of Hypoxic and Normoxic States, 289

T**T-cell receptor**

Analysis of Heart-Infiltrating T-Cell Clonotypes in Experimental Autoimmune Myocarditis in Rats, 118

TA-993

Inhibitory Effects of TA-993, a New 1,5-Benzothiazepine Derivative, on Platelet Aggregation, 643

Thrombin

Evidence for the Presence of a Proteinase-Activated Receptor Distinct From the Thrombin Receptor in Vascular Endothelial Cells, 581

Thrombin receptor

Thrombin Receptor Actions in Neonatal Rat Ventricular Myocytes, 553

Ticlopidine

Inhibitory Effects of TA-993, a New 1,5-Benzothiazepine Derivative, on Platelet Aggregation, 643

Transcription factor

Myocyte Enhancer Binding Factor-2 Expression and Activity in Vascular Smooth Muscle Cells: Association With the Activated Phenotype, 196

Preferential Differentiation of P19 Mouse Embryonal Carcinoma Cells Into Smooth Muscle Cells: Use of Retinoic Acid and Antisense Against the Central Nervous System-Specific POU Transcription Factor Brn-2, 395

Transfection

Novel Adenovirus Component System That Transfects Cultured Cardiac Cells With High Efficiency, 971

Transforming growth factor- β

Regulation of Endothelial Production of C-Type Natriuretic Peptide in Coculture With Vascular Smooth Muscle Cells: Role of the Vascular Natriuretic Peptide System in Vascular Growth Inhibition, 606

Transgenic

Transgenic Remodeling of the Contractile Apparatus in the Mammalian Heart, 504

Transgenic mice

Adverse Effects of Chronic Endogenous Sympathetic Drive Induced by Cardiac G_{sa} Overexpression, 517

Cardiomyopathy in Transgenic *myf5* Mice, 379

Transgenic Manipulation of Myocardial G Protein-Coupled Receptors and Receptor Kinases, 511

Transient inward current

Ca^{2+} -Induced Current Oscillations in Rabbit Ventricular Myocytes, 707

Transient outward current

Ionic Mechanism of Action Potential Prolongation in Ventricular Myocytes From Dogs With Pacing-Induced Heart Failure, 262

K^+ Currents in Human Coronary Artery Vascular Smooth Muscle Cells, 676

Tropoelastin

Tropoelastin Gene Expression in Individual Vascular Smooth Muscle Cells: Relationship to DNA Synthesis During Vascular Development and After Arterial Injury, 388

Troponin

Binding of Cytosolic Proteins to Myofibrils in Ischemic Rat Hearts, 821

Trypsin

Evidence for the Presence of a Proteinase-Activated Receptor Distinct From the Thrombin Receptor in Vascular Endothelial Cells, 581

Tyrosine kinase

EJ-Ras Inhibits Phospholipase $C_{\gamma 1}$ but Not Actin Polymerization Induced by Platelet-Derived Growth Factor-BB via Phosphatidylinositol 3-Kinase, 312

Intracellular pH and Tyrosine Phosphorylation but Not Calcium Determine Shear Stress-Induced Nitric Oxide Production in Native Endothelial Cells, 750

NO Flow Helps Clear Murky Waters? 945

U**Upstream binding factor**

Regulation of rDNA Transcription During Endothelin-1-Induced Hypertrophy of Neonatal Cardiomyocytes: Hyperphosphorylation of Upstream Binding Factor, an rDNA Transcription Factor, 354

Uptake₁ carrier

Upregulation of Cardiac Uptake₁ Carrier in Ischemic and Nonischemic Rat Heart, 1037

V**Vascular smooth muscle**

Ca^{2+} -Dependent Mitogen-Activated Protein Kinase Activation in Spontaneously Hypertensive Rat Vascular Smooth Muscle Defines a Hypertensive Signal Transduction Phenotype, 962

- Differential Distribution of Electrophysiologically Distinct Myocytes in Conduit and Resistance Arteries Determines Their Response to Nitric Oxide and Hypoxia, 431
- Identification of Protein Kinase C Isoforms in Rat Mesenteric Small Arteries and Their Possible Role in Agonist-Induced Contraction, 806
- Regulation of Matrix Metalloproteinases and Plasminogen Activator Inhibitor-1 Synthesis by Plasminogen in Cultured Human Vascular Smooth Muscle Cells, 44
- Tropoelastin Gene Expression in Individual Vascular Smooth Muscle Cells: Relationship to DNA Synthesis During Vascular Development and After Arterial Injury, 388
